

Design
Collection

Elegance at an elemental level.

Stone wool acoustical ceiling solutions

Simple elegance, naturally derived.

The Design Collection is crafted from natural stone, helping designers of clear vision and uncompromising principles create spaces that function beautifully and inspire all who enter.

Sourced from one of Earth's most abundant resources – volcanic rock – stone wool is durable and resilient and offers a low environmental impact. The manufacturing process for Rockfon stone wool emulates the natural formation of fine volcanic strands, known as Pele's hair, by spinning molten rock into resilient stone wool fibers.

Start with the elements of style.

Creating a sustainable ceiling solution that exudes elegance, performs exceptionally, and helps people feel truly present begins with mastery of the fundamentals. The Design Collection was born of inspiration from nature and shaped by four elemental principles:

Nf

NATURAL FOUNDATION

Stone wool ceiling panels are artfully forged from volcanic rock – super-heated back to its molten form, spun into fibers, then layered and shaped to meet precise specifications.

Du

DURABILITY

Rockfon ceiling panels are built to last, thoughtfully engineered using regenerative design principles that support long-term sustainability and prioritize material resilience and longevity.

Oc

OCCUPANT HEALTH

Stone wool offers high sound absorption and resists fire, mold, and mildew. The result is a space with powerful acoustical clarity and air quality, where focus, inspiration, and connection can flow freely.

Se

SIMPLE ELEGANCE

Bring an elegant, new dimension to any space with stone wool ceiling panels and monolithic solutions in a wide variety of colors, styles, and premium, refined finishes.

From natural stone
to your ceiling.

The stone wool ceiling tiles of the Design Collection are inspired by nature and made from one of Earth's most abundant resources. Volcanic rock is naturally regenerative with inherent properties that make it an ideal foundation for building materials. The Design Collection explores stone wool's aesthetic and design possibilities, while maintaining the tiles' unique performance benefits.

Rockfon Alaska®

DESIGNED FOR DURABILITY AND PERFORMANCE

Premium Rockfon Alaska® stone wool acoustical ceiling tiles resist fire, mold, and mildew, and won't sag or warp even in high humidity. Their smooth, white surface features a high light reflectance that enhances interior brightness, while offering outstanding sound absorption capabilities. Ideal for office, classroom, or auditorium applications.

Rockfon® Island™

STYLE AND PERFORMANCE UNBOUND BY CONVENTION

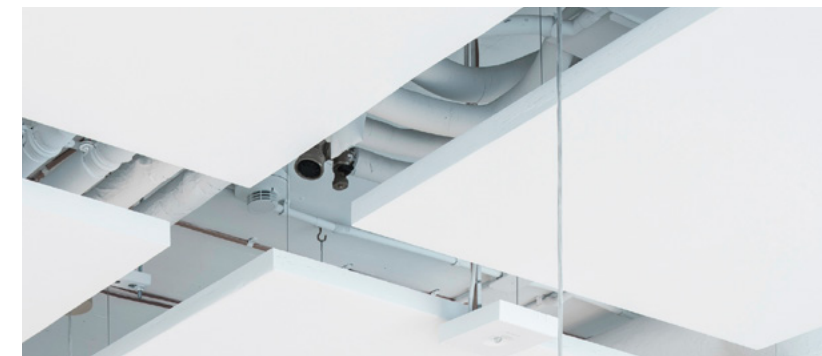

Rockfon® Island™ stone wool frameless acoustical cloud ceiling panels are an innovative solution ideally suited for spaces in need of acoustical corrections. These easy-to-install panels provide excellent sound absorption and bring a bright, modern aesthetic to open plenum ceiling designs.
