

Rockfon® Metal Ceilings Products

Rockfon® Specialty Metal Ceilings are available in a wide range of styles, sizes, finishes and exist in standard or custom configurations. Meets sustainable goals with 100% recycled content and locally recyclable products.

Rockfon® Infinity™ Perimeter Trim

Rockfon® Infinity™ Perimeter Trim offers designers infinite possibilities when creating light coves, floating islands or acoustical ceiling accents. Ideal for straight or curved ceiling edges, this attractive, smooth, rust- and distortion-free extruded perimeter trim is available in colors and wood-look finishes. Choose from fully concealed, semi-concealed, reveal or 0" depth edges that work seamlessly with standard suspension systems, other specialty metal ceiling systems and stone wool acoustical tiles like Rockfon® Alaska® and Rockfon Sonar®.

Rockfon® Spanair® Metal Panels

Rockfon® Spanair® panels offer design flexibility for wide-ranging interior and exterior applications. The panels come in a variety of sizes, profiles, materials and finishes. When combined with companion perimeter trim and accessories, Spanair panels can meet virtually any design need. Panels easily install with four different options. Colors, finishes and perforations provide creative freedom so owners and designers can achieve their design vision. Acoustic performance is enhanced by a variety of perforation designs and Acoutex™ backer options.

Rockfon® Planar® Macro and Planar® Macroplus Linear Ceilings

Rockfon® Planar® Macro and Planar® Macroplus Linear Ceilings create the look and feel of a wooden ceiling without the maintenance and issues of a true wood ceiling system. Panels are available in 4", 6" or 8" wide in painted, wood-look and metal finishes. The spaces between the panels may be left open for acoustical or air movement requirements, or closed with either separate filler strips (Planar Macro) or integral filler strips (Macroplus).

Rockfon® Planostile™ Metal Panel Ceiling System

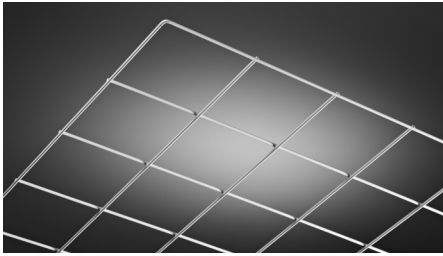

The Rockfon® Planostile™ Metal Panel Ceiling System is a durable and versatile metal panel ceiling solution for outdoor and indoor applications, available in square, reveal and flush reveal options. These metal ceiling panels are available in a wide variety of sizes and finish options including painted colors, metals and wood-look finishes. Combine these options with one of the many perforation patterns for increased acoustical performance, up to 0.90 NRC sound absorption.

Rockfon® Planar® and Planar® Plus Linear Ceilings

Rockfon® Planar® and Planar® Plus Linear Ceilings create the look and feel of a wooden ceiling without the maintenance and issues of a true wood ceiling system. Suitable for exterior, interior and seismic applications, this system features spaces between the panels which may be left open for acoustical or air movement requirements or closed with either separate filler strips (Planar) or integral filler strips (Planar Plus). This linear metal ceiling system can be installed flat or used to create radiuses and curves and are available in a wide variety of finish options including painted colors, wood-look and metal finishes.

Rockfon® Graphgrid® Open Plenum Wire Panel

Rockfon® Graphgrid® Open Plenum Wire Panel achieves an attractive open ceiling in interior spaces like lobbies, restaurants and hotels. The sleek, streamlined look can highlight a certain area or mask plenum components. Choose from the smallest 1" x 1" cell panel up to a 4" x 4" cell panel, available in colors and Metalwood® Coordinating Painted Finishes.

Rockfon® Magna T-Cell™ Open Plenum Ceiling System

The Rockfon® Magna T-Cell™ Open Plenum Ceiling System creates the illusion of a lowered ceiling while masking the plenum and maintaining an open design feel. This open cell ceiling system offers a bold aesthetic, designed to blend the suspension and panels together to provide a continuous, sleek appearance while maintaining accessibility to the ceiling plenum.

Rockfon® Curvgrid™ Curved Ceiling System

The Rockfon® Curvgrid™ Curved Ceiling System creates elegant, dramatic arches and feature areas. The system allows metal panels to follow the undulating ceiling plane, giving a continuous, ribbon-like appearance in spaces like assembly halls, auditoriums, lobbies, schools and hospitals. A variety of colors and wood-look finishes make it a flexible, versatile ceiling solution.

Rockfon® Cubegrid® Open Plenum 15/16" Ceiling System

The Rockfon® Cubegrid® Open Plenum 15/16" Ceiling System uses standard grid suspension that has been specifically manufactured with all extra holes and slots removed, allowing for a high-quality architectural finish on all sides. This easy-to-install, cost-effective, open ceiling system can be used to mask the plenum or highlight a specific space. Integral cross tee couplings, combined with no visible hanger slots and holes, makes Cubegrid the cleanest open cell ceiling suspension available.

Rockfon® Intaline™ Round-Base and V-Base Metal Baffle Ceilings

Rockfon® Intaline™ Round-Base and V-Base vertical baffles can be used to create a field of visual interest or used to define a space. These aluminum baffle ceilings are installed using a standard 15/16" acoustic ceiling grid which installs quickly and integrates with industry standard lighting and air diffusers. Rockfon Intaline baffles are available in a wide variety of finish options including painted colors, wood-look and metal finishes.

Rockfon® Metalscapes® Wire Mesh Ceiling Panels

Rockfon® Metalscapes® Wire Mesh Ceiling Panels are designed to conceal the plenum and allow for easy access. The panels can be used with a 15/16" grid suspension system, making installation fast and easy. These mesh ceiling panels may also be installed with Cubegrid® suspension for a greater choice of suspension finishes. The metal used to create these welded wire mesh panels contains no organic compounds to support bacterial growth.
