

# A Natural Foundation

Delivering high-performance stone wool ceiling solutions with a low environmental impact.

Part of ROCKWOOL Group

**Rockfon®**

# We Let Nature Lead

At Rockfon, we use stone, a material that recurs naturally from the Earth and is abundantly available. We take our inspiration from nature when we create healthy indoor environments, balancing human health, environmental impact and performance in everything we do.

## Natural Power of Stone

Sourced from volcanic rock, stone wool is manufactured by spinning molten rock into resilient fibers — emulating the natural formation of Pele's hair — to create durable, low-impact and environmentally resilient stone wool ceiling solutions.

### Abundant Resource

Every 20 minutes, the Earth produces enough new volcanic rock to supply the entire US ceiling tile market for a year.

### Regionally Sourced

With our facility in Mississippi, Rockfon is proud to be the only manufacturer of stone wool ceiling products in North America.

## Foster Health Indoors

With Rockfon, you don't have to choose between form and function.

### Dependable Acoustic Performance

Well-designed acoustic environments can foster clarity, calm and comfort — enhancing how building occupants feel, think and perform. In contrast, unwanted noise can elevate stress levels and hinder concentration.

### Inherently Resilient

Moisture, mold, fire and air quality are ongoing challenges in commercial spaces, but Rockfon stone wool ceilings are built to meet them. Inherently resistant to these hazards, our products require no added antimicrobials or fire retardants, delivering lasting protection and proven performance that aligns with industry standards.

## Protect the Outdoors

We believe sustainability starts at the source, with materials and manufacturing practices that reduce environmental impact across the entire lifecycle of a commercial building.

### Lower Our Impact, Raise Our Standards

The building and construction sector is by far the largest emitter of greenhouse gases,<sup>1</sup> but by using abundant materials and aligning our climate goals with the Science Based Targets initiative, we're taking measurable, science-backed steps to reduce carbon emissions globally.

### Climate-Resilient Future

ROCKWOOL Group and its subsidiary companies, including Rockfon, are investing in technologies and strategies that protect people and the planet, including:

- Electrifying energy-intensive processes
- Developing low-carbon innovations
- Prioritizing water stewardship

## Enduring Circularity

Our ceiling tiles are built to last. Backed by a 30-year warranty, our stone wool reduces the need for constant replacement, contributing less construction and demolition waste to landfills.

### Circular Models for a Lasting Impact

Our ceiling tiles are primarily made from one of nature's most abundant resources, stone, which is endlessly recyclable without loss of performance. They are designed to be used for as long as possible, minimizing waste and maximizing value.

### Closing the Loop With Rockcycle®

Rockfon offers Rockcycle, our stone wool recycling program, across the United States and Canada. The recovered stone wool is processed and recycled into new, high-quality stone wool products without the loss of performance.

## Simple. Sustainable. Stone Wool.

Today's architects are challenged to deliver more — healthy interior spaces, lower environmental impact and material transparency — while navigating tight timelines and complex performance requirements.

Built on a natural foundation, our stone wool ceiling solutions support healthy indoor spaces and a healthier planet through a commitment to circularity and durable materials.

**With Rockfon stone wool ceiling solutions, simplicity is our strength.**

**Rockfon®**

## Performance With a Purpose

Rockfon is part of ROCKWOOL Group, a global leader in stone wool solutions committed to building a better future. Together, we align with the United Nations Sustainable Development Goals by:

- Promoting responsible consumption and production
- Supporting climate action
- Fostering sustainable cities and communities

For Rockfon and ROCKWOOL Group, what is good for our business is good for the world.
