

Rockcycle®

Ensuring Rockfon products are responsibly collected and recycled, to support a circular economy.

How Rockcycle® works

Applicable Substrates

Rockcycle® is available for all Rockfon stone wool ceiling tiles - (other substrates are not currently accepted).

Compliance

We cannot recycle products potentially contaminated with materials classified as hazardous waste by local or federal authorities.

Process

Customers are responsible for palletizing and packing materials ahead of collection.

How to prep for Rockcycle®

Stack materials

in 4-foot-high increments on standard 4x4 shipping pallets to ensure safe and efficient handling during collection.

Secure tiles firmly

to the pallets using stretch wrap or metal bands to prevent shifting or damage during transport.
