

Program Title: Suspended Ceilings and Acoustical Solutions using Stone Wool

Provider Name: Rockfon

Length: 1 Hour

Credits: 1 LU 1 GCBI CE

SD: Yes

HSW: Yes

Program Overview: Architects, Specifiers, Interior Designers, and Building Science Professionals all have a long history of specifying Stone Wool for their insulation and sound absorption needs. Fire resistance, sound resistance, water resistance, thermal resistance, and dimensional stability are all features and benefits of Stone Wool. This presentation will discuss and explain in detail the features and benefits of using stone wool acoustical ceiling tiles. There will be an introduction to acoustics along with acoustical challenges and resolutions in commercial buildings.

Learning Objectives:

- **Discuss the different types of grid systems used with acoustical ceilings**
- **What is stone wool and what are the features and benefits**
- **Introduction to Acoustics**
- **Acoustical challenges and resolutions**
- **Sustainability and LEED**
- **Installation**

Facilitator Qualifications:

- All Rockfon CES facilitators have been trained on CES guidelines and presentation skills.

Method of Delivery:

- The CES facilitator utilizes a PowerPoint presentation to provide an in-depth overview of mineral wool insulation.

Audio/Visual required:

- Laptop and projector. (The CES facilitator supplies the laptop and projector unless other arrangements have been made before the day of the presentation.)

Cost to participants:

- There is no cost to bring this program into your firm or chapter meeting.

Target Audience:

- Architects, interior designers, specifiers, owners, contractors, and other design professionals. Ideal audience can be 1 to over 100. This program meets every experience level with time designed in the program for questions and answers.
